« Today, 34% of companies consider that they lack information and history when it comes to managing their equipment fleets. So we came up with Fleezy! This software solution is a real asset for any type of company wishing to gain efficiency in managing an employee's equipment, from arrival to departure. »

Matthieu Echalier, Chairman and CEO, GAC Technology

FLEEZY

A solution developed by GAC Technology

Fleezy is the brainchild of management software publisher GAC Technology. With 15 years' experience in the field, the group offers 100% web-based solutions for companies, including fleet management, real estate and telecom management.

Simple, effective and efficient, the software brings together all your fleet information in a single portal. It supports you in the strategic management and operational monitoring of your assets.

Find out how Fleezy can help you manage your equipment and request a free, personalized demonstration!

Why invest in fleet management software?

fleezy

CENTRALIZE

All your data always accessible in a single tool in SaaS mode
(100% web-based)

FOLLOW

Immediate visibility of all your assets and the history of their allocation to employees

ALERT

Personalized notifications so you never miss a deadline (end of contract, maintenance, etc.)

ECONOMIZE

Efficiently control your expenses thanks to a cross-functional view
on your assets

COLLABORATE

Workflow for simple, seamless management for all employees

A BUSINESS TOOL

Simple, customizable and scalable

A company's equipment pool is made up of a wide range of goods and services made available to employees: computers, telephony, badges, licenses, vehicles, etc. Each has its own characteristics (costs, brands, contracts, etc.).

Each one has its own characteristics, so it's important to be able to list and track them easily.

Fleezy is 100% web-based! Centralize all your fleet data in a single portal, accessible at any time via a simple Internet connection.

Coming soon

Cards & Badges

Hardware computer
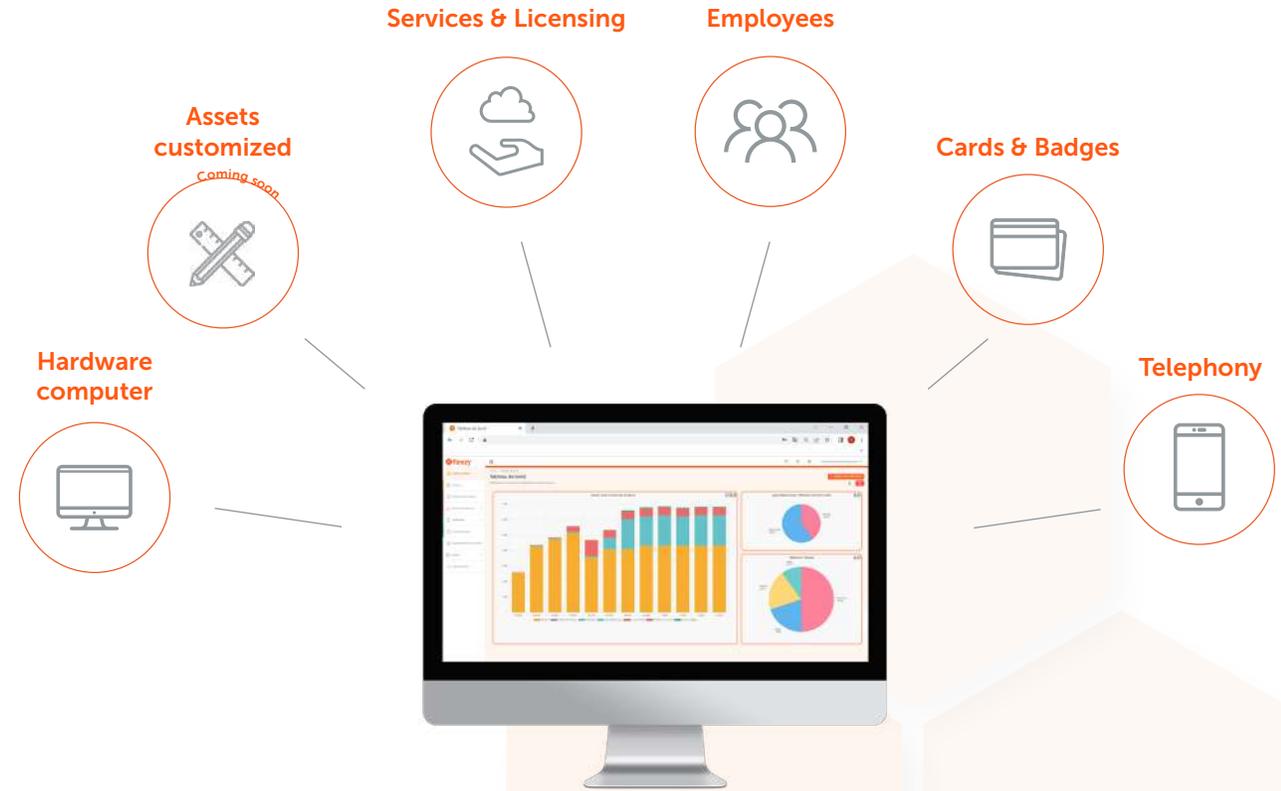

Telephony

Choose the goods and services you wish to track

fleezy

Telephony

Keep track of all phones (mobile and fixed), lines and related contracts or subscriptions.

Hardware computer

Laptops, desktops, tablets, servers... Keep track of all your hardware in Fleezy. For each piece of hardware, you can associate peripherals: keyboards, mice, screens...

Cards & Badges

This module contains all the badges or cards you entrust to your employees: payment cards, fuel cards or electronic toll badges, security and building access badges, IT security badges...

Services & Licensing

Manage services linked to a particular department (HR, legal advice, etc.) or building (cleaning, security, etc.). You'll also be able to compile all your computer licenses (desktop or SaaS), so you don't miss any deadlines or tacit renewals.

Employees

Use personnel tracking sheets to manage equipment allocations and returns, generate equipment handover certificates, access the history of allocations by employee, and anticipate your equipment management for arrivals and departures.

OPTIMIZE THE USE OF ITS EQUIPMENT

A CUSTOMIZABLE DASHBOARD

In your customizable dashboard, you select the widgets best suited to your needs. At a glance, you'll see the key indicators you need to optimize the management of all assets used by your employees.

Which computers are available for assignment? What are the trends in the number or cost of your computer licenses? Which contracts are due to expire in the next 30 days? Choose the information you need to know, and freeze it in your dashboard.

AN INVENTORY BY ASSET TYPE

Via the pages dedicated to each type of asset, you can access an inventory of all goods and services, along with their individual identity sheets. For each asset, you'll find important information about it and details of the related contractual commitment (lease, purchase, etc.).

You can also add peripherals (keyboards, screens, mice, etc.), accessories (floor mats, towbars, etc.) or link and store documents (purchase invoice, rental contract, initial inventory, etc.).

AN OVERVIEW OF CONTRACTS

A direct view of all contracts for all your goods and services enables you to immediately identify the number, type and status of current commitments. Whether for subscriptions or rentals, you can view contracts and their expiry dates in real time.

MANAGE YOUR EQUIPMENT SIMPLY AND EFFICIENTLY

A NOTIFICATION AND ALERT SYSTEM

Never miss a deadline again! For each good or service, you can define notifications that Fleezy will remind you of within the required timeframe.

This way, you're alerted to equipment events in real time (maintenance, overhauls, contract renewals, etc.).

QUICK AND EASY DATA SET-UP

Each property or employee can be created in Fleezy with the level of detail you require. And to help you get started, you can import your data files directly into the software: creating collaborators, assets, etc...

You can also easily duplicate a property to quickly create an identical asset. All you have to do is change the information differentiating the new asset.

ENHANCED SAFETY

In the «Users» menu, you can precisely define the access rights of the people who will use the software. For example, you can restrict access to viewing and managing hardware to your company's IT manager.

Our tool is fully compliant with the General Data Protection Regulation (GDPR). We guarantee the storage of your confidential data under reinforced security.

SUCCESSFULL INTEGRATION OF EMPLOYEES

fleezy

MONITORING OF EQUIPMENT ALLOCATIONS

The allocation function allows you to indicate to which employee each good or service has been entrusted. The calendar also allows you to define the exact date on which this was done, and set the return date. You'll always know to whom the goods have been assigned, and you'll also be able to see at a glance what needs to be returned when the employee leaves.

Note: the history of these associated allocations can be viewed directly in the employee's identity file (history of all assets allocated to him/her), or in the asset history files of the employees to whom the asset was allocated during its lifetime within the company.

ONBOARDING AND OFFBOARDING

Create multiple tasks and assign them to the various company stakeholders. A notification is sent to each of them to prepare all the necessary elements for the arrival or departure of your employee. Your employee's integration is simplified!

THE GAC QUALITY

Listening to customers for high-performance tools

fleezy

CUSTOMIZED START-UP

The tool is prepared for adaptation to your company and your hardware. This involves setting up the technical environment, configuring the software and integrating your data.

PERSONALIZED SUPPORT

At the start of your project, a dedicated contact person will help you set up and train the tool. Should you have any questions, our customer support team will be delighted to answer them.

A COMPLETE SUBSCRIPTION

When you choose Fleezy, you benefit from access to your data integration, an unlimited number of users and guaranteed updates.

ACTIVE COMMUNICATION

Proximity to our users is paramount. That's why we make it a point of honor to keep you up to date with all the latest news about our solution.

AN AGILE ORGANIZATION

The design and realization of each project are controlled according to a strict quality process. Before each production launch, the evolution is checked and tested to ensure that it functions perfectly.

ENHANCED IT SECURITY

Our tool is fully compliant with the General Data Protection Regulation (GDPR). We guarantee the storage of your confidential data under reinforced security.
